

## ***News Release.....***

### ***LAKE HURON & ELGIN AREA PRIMARY WATER SUPPLY SYSTEMS***

**March 27, 2017**

**FOR IMMEDIATE RELEASE**

## **2016 Water Compliance Reports Available On-line**

Are you looking for information on water quality or water requirements? London and area residents have ready access to the annual Compliance Reports for the regional water supply systems serving Bluewater, Lambton Shores, London, Lucan-Biddulph, Middlesex Centre, North Middlesex, South Huron, Strathroy-Caradoc, Aylmer, Bayham, Central Elgin, Malahide, Southwold, and St. Thomas by visiting <http://www.watersupply.london.ca/reports.html>

The Compliance Reports provide information to the public on such things as water quality, the quantity of water supplied to the area municipalities, and the quantity of treatment chemicals used in the treatment and provision of safe drinking water to the region.

“Our website is an integral part of providing our customers with important and up-to-date information on the water supply systems” says Andrew Henry, Division Manager, Regional Water Supply. “The two regional water treatment plants continue to provide clean and safe drinking water which surpasses the minimum standards required under the *Safe Drinking Water Act*.”

The water systems’ website provides information on the water supply systems on behalf of the respective Board of Management which individually governs each of the Lake Huron and Elgin Area Water Supply Systems, and provides public information such as quarterly water quality reports, news bulletins, capital project and system information.

The annual Compliance Reports are a requirement of the Ontario Drinking Water Systems Regulation issued under the *Safe Drinking Water Act, 2002*.
